

CNC Programmer

GEMCITY Engineering and Manufacturing (GEM) is looking to fill this position with an experienced self-starter. This person will work with minimum oversight to complete assigned jobs on-time and within target parameters.

Core Activity

- Write custom CNC programming code for three and four axis vertical and horizontal machining centers with Fanuc controls.

Requirements

- Minimum five years of programming experience with a strong custom machining background.
- Must be able to analyze part designs to develop proper part fixtures.
- Must be able to analyze process machining requirements to establish optimum cycle times.
- Must be able to assist qualified machinists with program debug and implementation.
- Must be able to review existing, on-going programs and refine them with GEM's Continuous Improvement of Processes.
- Experience with a wide range of materials and requirements is needed.

Position offers full benefit package including Medical (PPO and HSA options), Dental, Vision, Disability, Life and other Voluntary insurance offerings, along with a competitive salary, 401K and tuition reimbursement. ISO certified, this facility is very clean and climate-controlled.

GEMCITY Engineering and Manufacturing will only employ those who are legally authorized to work in the United States for this opening. Any offer of employment is conditioned upon the successful completion of a drug screen, physical, and background investigation.
